.....
While we cannot claim to stop the natural aging process, we can offer you the next best thing. SharpLight's non-invasive skin rejuvenation solutions have the power to eliminate the signs of aging and restore a fresh, glowing and youthful look to your skin.

With a new triple-headed treatment, which safely penetrates the skin using Intense Pulsed Light (IPL) together with Radio Frequency (RF) and Infrared (IR), you can expect immediate, long lasting results in just a few visits to the clinic, with absolutely no downtime.

The balanced mix of treatments effectively reduces wrinkles and pigmentation, tightens skin and makes you look and feel young.

Frequently asked questions

“It’s quite amazing how skin treatments which are this transforming, could be done in such little time” - Betty Czajkowsky M.D.

About Facial Skin Rejuvenation Treatment

Q: What is Intense Pulsed Light (IPL)?

A: Pulsed light systems use hand-held flash lamps that emit gentle pulses of light which are absorbed in the skin. The treatment stimulates the growth of collagen and gives the skin a fresh and youthful look.

Q: What is Infrared (IR)?

A: Infrared is a light based technology that creates focused heat, thus contracting collagen and tightens the skin, without damaging surrounding tissue.

Q: What is RF?

A: Radio Frequency technology uses multipolar sound waves emitted by a handpiece that heat collagen fibres thus contracting and tightening the skin.

Q: What are the benefits of using the triple solution?

A: Using the IPL, RF and IR technologies together, allows deep, yet safe penetration into the multiple skin layers, subsequently remodeling collagen, tightening skin and improving scars. In addition, it ensures immediate, long lasting results in just a few visits to the clinic, with absolutely no downtime.

Q: Is it safe to rejuvenate skin at any age?

A: Age is not an issue when it comes to non invasive procedures, as they are safe and reliable.

Q: How many treatments are required?

A: Although results are already apparent after the very first treatment, a minimum of 3 treatment sessions are necessary to achieve clear results.

Q: How long does a skin rejuvenation treatment take?

A: Around 30 to 60 minutes depending on the technologies combination.

Q: Is the treatment painful?

A: You may experience a slight tingling sensation, but no pain.

Q: Do all treatments utilize the 3 technologies (IR, RF and IPL)?

A: No. It depends mainly on the patients' skin and the degree of aging. It is possible to use each technology individually or to combine the 3 of them when necessary.
